ELECTRICITY RATE COMPARISON INFORMATION

(To be provided with Disclosure Statement)

An average house in Nova Scotia uses approximately 10,000 kWh of electricity per year. Customers can review their previous bills to determine the amount of electricity they use each year.

¢/kWh).	ge of \$per month and an Energy charge of ract with < <retailer's name="">>, this would cost</retailer's>
	rge of \$ per month, a Distribution Charge
Based on Nova Scotia Power's currently appr bill, this is:	roved rates which are shown on your bi-monthly
Nova Scotia Power's	< <retailer's name="">></retailer's>
current rate for electricity is ¢/kWh	rate for electricity is ¢/kWh
as of	for years.
Nova Scotia Power's rates are approved by the Nova Scotia Energy Board. Historical electricity rate information can be found on the Board's website at https://nserbt.ca/nseb .	< <retailer's name="">> will also charge you for the cost of delivering electricity to your home or business at a rate approved by the Nova Scotia Energy Board. This rate is currently</retailer's>
	The total rate charged by < <retailer's name="">> is¢/kWh.</retailer's>
	There may also be a one-time charge to install a new interval-type meter.
